

PRESS RELEASE

May 14, 2010

Carlisle, Massachusetts and Cape Elizabeth, Maine Choose FBGov Software for Permitting and Licensing

Hawkeye Government Solutions with the FBGov Software as a Service Solution continues working with municipalities in Maine and Massachusetts. This past week we exhibited at conferences with the Maine Building Officials Inspectors Association and the Southeastern Massachusetts Building Officials Association. We found that in both states a willingness to explore new technology as long as it is practical and helps them do the job. As a new company, we are excited that we have just got chosen by these two municipalities.

Carlisle, MA is our first Town with a population of under 5,000. Because FBGov Software as a Service is extremely scalable; the Town can benefit. Soon, contractors can also start and follow up on permits in Carlisle and the neighboring FBGov towns of Westford and Chelmsford. This is going to be the first Permitting solution installed in Carlisle.

Cape Elizabeth, Maine completed a thorough review of several software solutions and chose FBGov Software as a Service. The reason for their decision was based on the quality of FBGov Software as a Service and our competitive price compared to other companies. Cape Elizabeth now joins Kittery, Maine as FBGov Clients.

Because the FBGov Software as a Service is hosted on the Hawkeye Cloud, our clients will not have to worry about backups or getting the latest releases of our Software.

About Hawkeye Government Solutions and the Town of Westford, Massachusetts:

Hawkeye Government Solutions is a software development and services organization addressing a variety of municipal land management applications. In July, 2009 our company finalized a contract creating a public private collaboration with the Town of Westford, Massachusetts, whereby, the Town created a suite of innovative land management software for permitting, licensing, zoning, conservation, board of health and complaint tracking. Our team markets and provides software support services for FBGov (For and By Government) solutions.
